### About This Game

Steam Squad - tactical wargame, where gameplay takes place at the alternative universe with steampunk details during the times of the Great War amongst colorful anime like settings as if drawn by Miyazaki himself. Game is posing a question what if? What if Tianxian Empire was able to colonize Siberia before Russia did and later had started war to extend its ownership over the rest of Europe and America?

Players acting for the 3 of the world superpowers - Britain, Tianxia and the Holy Roman Empires have teams of up to 8 units equipped with guns and machinery of the times of WWI in order to complete 30 tactical missions. For instance, you can be asked to capture an area, defend a lodgement or a person, attempt to sabotage, etc.

### **To succeed in the game, players must:**

- Equip their teams according to the chosen strategy - select the right units, ammunition and armory for the mission;
- Read mission tactical maps;
- Lead units in the smart way and accurately - they are so easily killed and you have only few of them;

### Key Features

- Realistic and complexity - actions in the game are driven by solid physic based combat mechanics and this is what it makes to be similar to the classics of table games - Warhammer, Infinity the Game;
- Possibility to use its own and take over enemy equipment - tanks, cannons and mortars;
- Possibility to equip units according to the tasks of the missions and your preferences;
- Original weaponry that is similar to the one used during the times of Great War;
- Battlecam with a depth of field effect and nice color correction, that gives an old film feeling;
- Beautiful settings as if drawn by Miyazaki himself;
- Nice little perks like - destroyable environment, interactive fauna and melee weapons;

We sincerely want you to enjoy Steam Squad as we tried hard to make it interesting. Your support and feedback is vital for us as they help us to improve and make game even better.

If your childhood involved an imaginary sports league, with a whole universe of teams, players, and games, and a pad of pencil-and-paper statistics and results (or, later, a word-processor file full of the same): this is the game for you.

I've been playing versions of this game since 1998. The most important thing I can say about the game is that the balance of power is both robustly and finely tuned, and there are no tricks. By this, I mean the following: there are (like real football) many, many things you can do with roster-building, cap management, and gameplanning to try to build an edge over the other teams in the league, but there is no single "trick" to winning. 17 years of development have helped to refine this balance. Long-time players of the game have an advantage, but they're not cheating the AI.

The statistical engine is scrupulously accurate. Again, more than 17 years of research has gone into making the game what it is.

. Way easier than the keyboard verison. The CD key is invalid... please help me. Hauntingly beautiful game about confronting the darkest parts of love, obsession and human nature.. WTF is this?! A solid visual novel with well designed characters, an interesting premise and a fantastic sound track. I had not played too far, but I expect it to be a good story. A bit problem: you can play all 4 chapters right from beginning, so I am affraid of "spoilers". And another one: where is the sound tracks. IWANTITRIGHTNOW!

If you are a Tomb Raider fan and want to have the full collection of this game then buy it only on sale and buy the GOTY edition.

RIP Multiplayer btw.. In this universe you get to play as an older, didn't make it on youtube so he started ghost hunting, jackscepticeye. 10/10 would not play for two years and then play again then realize how much you wasted your life.. Immersive, scary, fun. The shooting mechanics are really good. You actually line up the pistol sights like real life and the Vive controllers feel very natural.. \u6211\u7684\u5927\u718a\u732bQAQ

14\u5e74\u524d\u73a9\u7684\u6b63\u7248\u6e38\u620f\u4e86.... Space Grunts has excellent balance and progression. Every couple levels the challenge is slightly amped up with options of alternate routes, weapon upgrades and newer smarter enemies. Also has a leader board, daily challenges and many secrets to discover. Having a lot of fun playing Space Grunts :). I may be 'too angry to space'...but I'm also too overjoyed at the enjoyment I'm having with this game to give it a less-than-stellar review! One of my favorite platformers already...even after a bit over an hour of playtime. The trailer alludes to the fun you can have, and even where it mentions how you can use one hand to play, and one to enjoy a beverage of choice...lol. So far I think it good advice to shoot first when coming into a level or a new entrance to a different part of a level...it sure can't hurt...and it's proven in a short time that it's a lot of fun to play...even if there's a rage-quit or two...and already I can tell that there's replay value as well. There is the homage to games of old...both with graphics/gameplay and some difficulty-spikes here and there, but I'm sure enjoying this game in the here and now. Very happy with the decision to buy this game!! Easily recommend, especially if the trailer looks good to you.. ok its an old game and was never a block buster, but for £2 on the steam sale it's worth buying to fill the time between better games. I only recommend this on those terms. In all other situations, I wouldn't bother.. I wouldn't really call this so much a proper game and more like an interactive audio visualization program with game elements. That being said, if you look at it from that stand point it's still a very beautiful program and a unique way to experience your music if you need a break from Audiosurf. A horse, a horse! My kingdom for a horse!
